Abdul Rehman

abdulrehman6@cmail.carleton.ca | +1 (343) 540-7126 | LinkedIn | github.com/dkabduli | Portfolio

Experience

Founding Software Developer | *Next.js, React, Supabase, PostgreSQL* Sept. 2026 – Present
4Ummah *Remote*

- Built the organization flow end to end, from registration and admin review to job postings, on Next.js.
- Automated listing imports from company job boards and the App Store, blocking redirects to private hosts.
- Shipped **100+** commits through code review on a **5**-developer team, enforcing access with Postgres RLS.

Infrastructure Dev Intern | *Next.js, PostgreSQL, Ansible, n8n, Azure* May 2026 – Present
Shared Services Canada *Ottawa, ON*

- Led development of a government WiFi request web app, replacing spreadsheets with bilingual forms and SSO.
- Implemented secure client links, audit tracking, and automated bug-report routing to the issue tracker.
- Validated the release with **121** automated tests; added **30**-day inactivity alerts for stalled requests.
- Automated request routing across **10+** service areas with n8n, validated on **25+** production tickets.
- Reduced provisioning time from hours to under **10 min** by migrating **7** n8n workflows to Azure.
- Reduced certificate setup from **20–30 min** to under **2 min** by automating it with Ansible and OpenSSL.

NetDevOps Intern | *Ansible, GitLab CI/CD, Zabbix, Linux* April 2025 – April 2026
Shared Services Canada *Ottawa, ON*

- Identified **132** inactive GitLab accounts through an API audit, enabling deactivations that cut license costs.
- Automated health monitoring and alerting for **75+** network devices using Ansible playbooks.
- Eliminated manual health checks across release stages by integrating Zabbix into CI/CD pipelines.
- Removed **30%** of redundant steps by refactoring **20+** Ansible playbooks and automating **15** monitoring jobs.
- Scoped an Ansible Forms self-service portal for other teams; roadmap approved by senior engineers.

LAN Operations Technician | *Juniper Junos, Linux, Visio* May 2024 – April 2025
Shared Services Canada *Ottawa, ON*

- Remediated known vulnerabilities on **50+** Juniper switches by scripting firmware upgrades in Linux.
- Reduced lookup time by **40%** by consolidating network documentation for **10+** Ottawa-area sites.
- Designed Visio network diagrams for **10+** Ottawa-area sites, adopted as the primary field reference.

Projects

VisionCcompanion | *Hackathon – TypeScript, FastAPI, Gemini, ElevenLabs* visioncompanion.vercel.app

- Engineered a real-time hazard-detection app for visually impaired pedestrians using Gemini vision and TTS.
- Achieved **1.2 s** scene analysis and **0.2 s** speech latency by benchmarking and selecting optimized models.
- Owned the repository for a **4**-person team; built the camera pipeline (**32** tests) and FastAPI backend.

BlackBoxNet | *FastAPI, React, TypeScript, PostgreSQL, Docker* blackboxnet-web.onrender.com

- Built a network incident replay platform with **12** outage scenarios across Cisco, Juniper, and Nokia.
- Implemented root-cause analysis by diffing device configurations with **3** vendor-specific parsers.
- Added live SSH collection with automatic credential redaction; deployed with **14** automated API tests.

Technical Skills

Languages: Python, TypeScript, Java, C/C++, SQL, Jinja
Automation & Cloud: Ansible (AAP), Docker, Git, GitLab CI/CD, GitHub Actions, n8n, Azure, Linux
Networking: TCP/IP, BGP, OSPFv2/v3, EIGRP, MPLS, STP, VLANs, Cisco IOS, Juniper Junos
Tools: Zabbix, Wireshark, Elasticsearch, HashiCorp Vault, PostgreSQL, MySQL, Visio

Education

Carleton University | *B.IT. Network Technology – 4th Year* ***Expected April 2027***
Coursework: DevOps, Troubleshooting IP Networks, Advanced Network Security, Network Management & ML, Cloud Computing & Virtualization, Advanced Network Routing, Wireless Networks, Data Structures, Databases
Extracurriculars: Resource Director, Islamic Awareness Week – Carleton Muslim Students' Association
